Church Planting Opportunity in Kenya

One of MANNAs core values is partnering with the local church in helping them achieve the goals and mission God has set before them. We believe the local church is the avenue the Lord uses today to work in the lives of so many. Our Africa team is in the strategic planning phase of helping one of our Kenyan pastors reproduce healthy churches in five remote areas of Kenya. We are praying for partners, and churches who may have a passion to help us plant national churches in Kenya. Whether it be through financial support or going on a trip with us to help train national pastors in planting churches and theology. If interested please reach out to me through email and we will work it out. We plan to go this July for a few days to visit the areas where we are praying to plant churches.

Reproducing Fruit

Eba was a student at the school the BBFI and MANNA Worldwide helped us revamp nearly nine years ago in Ethiopia. Over the years we have had the privilege of watching Eba grow into a great young man. In the earlier years of the Bethel Baptist Church plant, Eba was our translator, from there he began to lead worship and help with the kids ministry and a key part to the sports outreach, all before he graduated high school. After completing High school the government placed him in a University in another town. Even with the distance he and I continue to meet and talk about the Bible and theology. This past month he was selected of seven students to lead a student led Christian group on Campus. Eba leads a Bible Study weekly on the campus with over 400 students. This is the fruit of your labor of prayers and giving to the ministry over the years. We look forward to what the Lord will continue to do in and through Eba. The future is bright in Ethiopia and all over Africa. We cant thank you for your continued prayers and financial support to help change eternity of so many.
